What You Will Learn

Introduction to FIDIC and the FIDIC Forms of Contract

Gain a practical understanding of FIDIC contracts, how risks are allocated, and the roles and responsibilities of each contracting party

Introduction to Claims

Define and structure construction claims, link risk allocation to claim entitlement and apply the full claims management lifecycle effectively

Employer Claims

Identify all contractual grounds for Employer claims under FIDIC and strengthen contract administration from the Employer's perspective

Contractor Claims

Identify all contractual grounds for Contractor claims, assess entitlement to time and cost under FIDIC and strengthen your ability to prepare and defend claims

Extension of Time Claims and Delay Damages

Assess project delays, evaluate Extension of Time (EOT) claims, and apply recognised delay analysis techniques to support contractual decisions.

Claim Preparation & Presentation

Develop clear, well-structured and evidence-based claims that effectively demonstrate cause, entitlement and quantum.

Disputes & Arbitration

Understand the anatomy of disputes under FIDIC, apply dispute avoidance and resolution strategies and understand the DAAB process procedures for resolving construction disputes .

ABOUT THE TRAINER

Eng. Kevin Nyakundi

BSC| MBA| R.Eng |MIEK | MICCP | PMP |PMI-SCP | FIDIC Certified Contracts Manager | FIDIC Certified Trainer

With over 15 years of industry experience, Kevin is a Registered Engineer, FIDIC Certified Contracts Manager, and FIDIC Certified Trainer
